Duxbury Clipper

ROUND AND ROUND WE GO – DPW Director Wally Tonaszuck said this week that the state DPW has agreed to modify the Route 14 roundabout on the westbound side (see barrels) to force vehicles to slow down. The flow on that side has proven to be too aggressive and cars are not impeded by channeling as in the other approach. Work will begin this month on the final change to make that side less of a straightaway. The traffic circle was recently curbed, loamed and seeded.
